

Face Finder Widget

Lucien ZHU, Dark ZHENG, Buffalo XIE

04/11/10

Peking University

Part I

Introduction

The project is created because of a WS purpose for its initiator Lucien Zhu, a senior undergraduate who is fond of knowing every PPMM in campus. Dark and Buffalo are two nice guy showing great help to Lucien.

Part II

Overview

The widget is to find similar faces in a database to assist users to get information of target easier.

- Input: a series images of a PPMM.
- Output: a list of possible PPMM candidates from a SNS website, e.g. [renren.com](http://www.renren.com).

So far, the project are described in 3 parts (See Fig.1):

- Interface.
- Face Detection and Matching.
- Database Management.
